PROFESSIONAL SUMMARY

Bachelor of Science in Information Technology graduate specializing in Game Development, with a solid background in software development, database management, and web technologies. Proven ability to develop engaging applications, enhance user experience, and solve complex problems through strong analytical skills.

WORK EXPERIENCE

IGT Solutions Inc.

July 14, 2023 – November 11, 2023

Travel Associate

- Delivered exceptional travel support and booking assistance, ensuring seamless customer experiences.
- Resolved customer inquiries with a focus on maintaining high service quality and satisfaction.
- Managed account-related travel inquiries efficiently, improving response times by an estimated 20%.

Verafede Inc.

February 23, 2026 – April 24, 2026

Graphic Design Intern

- Created compelling graphics and digital assets for diverse client projects, contributing to client satisfaction.
 - Collaborated with design teams to implement revisions, enhancing visual quality and coherence.
 - Managed multiple design projects simultaneously, consistently meeting tight deadlines and client expectations.
-

PROJECTS

Budget Life (Capstone)

Game Developer

- Developed budgeting, banking, loan, savings, and investment systems using JavaScript in RPG Maker MZ.
- Implemented persistent data management to save and load player financial progress.
- Designed gameplay mechanics that simulated real-world financial decision-making through interactive RPG elements.
- Created some of the 2D pixel art assets using Aseprite, including game objects and visual elements

SQL POS & Inventory Management System

Full Stack Developer

- Developed a desktop-based Point of Sale (POS) and Inventory Management System using VB.NET and Microsoft SQL Server.
- Designed and managed a relational database to handle products, inventory, sales, customers, and transactions.
- Implemented core features such as sales processing, inventory tracking, user authentication, and CRUD operations.
- Collaborated with team members to design, develop, test, and improve the system while ensuring accurate data management.

Alamat: 2D Top-Down Adventure

Game Developer

- Built comprehensive combat, inventory, and progression systems that enhanced gameplay dynamics.
 - Implemented backend game logic and UI functionalities, contributing to overall user experience quality.
-
